

# Employees see their home

**hema employees present their highlights from the region in a photo competition.**

The management initiated an internal photo competition to find motifs in the region which, as framed posters, contribute to the beautification of the working environment in production and development.

The hema team photographed numerous highlights of the region such as landscapes of the Ostalb, well-known buildings like Kapfenburg Castle and Baldern Castle or special weather phenomena and thus clearly documented that the Ostalb does not have to be miserly with its charms.

A total of 27 high-quality and, in the truest sense of the word, "picture-perfect" photographs were submitted. All employees then voted democratically on the best picture.

This photo won the competition →

The winner can look forward to a dinner for two people.
